Eligible: AEWV (NZ) | Visa 482 (AU)

PROFESSIONAL SUMMARY

Career-changer with a strong technical foundation, combining a newly acquired Full Stack Development qualification (React, Node.js, TypeScript, Docker) with 5+ years of professional experience in high-complexity field operations. My background in fibre network infrastructure — where precision, autonomous problem solving, and zero-error tolerance are critical — translates directly into disciplined, production-minded development. Completed two back-to-back internships delivering real-world features. Looking to join a team in New Zealand or Australia where I can grow fast and contribute meaningfully from day one.

KEY SKILLS

FRONTEND

- React.js
- TypeScript
- HTML5 / CSS3
- UI/UX Implementation
- Data Visualisation (Charts)
- Responsive Design
- Component Architecture

BACKEND & INFRA

- Node.js / Express
- TSOA (Type-safe APIs)
- BullMQ & Redis
- Docker & Containerisation
- Database Management
- RESTful API Design
- Agile / Scrum

TRANSFERABLE

- Technical Problem Solving
- Field & Systems Thinking
- Autonomous Work Ethic
- Client-Facing Communication
- Digital Reporting & Documentation
- Project Coordination
- Adaptability & Resilience

CAREER HISTORY

Junior Full Stack Developer (Internship) | Semantik Match — France

December 2025 – Present

Full stack development role within an HR-Tech environment, focused on enhancing a candidate matching platform with scalable backend features and an improved user interface.

Key Achievements

- Led a complete UI/UX overhaul of the candidate platform, improving visual consistency and navigation flow across the product.
- Designed and built an Autofill profile feature, allowing users to automatically populate forms with their profile data — reducing friction and improving completion rates.
- Implemented an AI-driven pre-filtering system to refine candidate search results, improving matching accuracy and data processing efficiency.

Key Responsibilities

- Built and maintained RESTful APIs using Node.js and TSOA, with full type safety and auto-generated documentation.
- Developed dynamic, performant React interfaces with a focus on seamless user experience.
- Managed asynchronous background jobs using BullMQ and Redis; maintained consistent environments via Docker.

Junior Full Stack Developer (Internship) | Moustache Bikes — France

June 2025 – July 2025

Developed internal digital tools for a premium e-bike manufacturer to support dealer network management and sales analytics.

Key Achievements

- Contributed to a full graphical and functional overhaul of the retailer portal, making key business data significantly more accessible and visual.
- Integrated front-end components displaying real-time statistics and customer insights for store managers.

Key Responsibilities

- Built dynamic React interfaces for managing dealer networks, inventory levels, and performance charts.
- Collaborated with the digital team to align new internal tools with high-standard brand guidelines and UX requirements.

Fibre Field Technician — Senior Level | ERT Technologies / Altice — France

June 2020 – December 2025 | 5.5 years

Senior field technician on FTTH/FTTB infrastructure, running full diagnostic cycles, managing 24/7 emergency response, and mentoring junior staff. Completed Full Stack Developer retraining (Pro-A programme) in parallel from 2024.

- Independently managed the full fault-to-fix cycle for critical FTTB/MDU and B2B fibre accounts — precision and zero-tolerance mindset directly applicable to production environments.
- Onboarded and mentored junior technicians on complex installation and maintenance protocols.
- Digital Reporting & Signal Testing: Expertly utilized field testing equipment including field strength meters and spectrum analyzers to validate signal quality, while ensuring accurate digital compliance reporting across network asset management platforms. — strong habit of clean documentation carried into development.
- Operated in certified electrical and high-risk environments — demonstrates rigour, attention to safety standards, and composure under pressure.

Agricultural Worker / Field Operative | NQ Fresh & Groves Grown Tropical Fruits — Queensland, Australia

June 2018 – April 2020 | 2 years

- Worked and communicated entirely in English in a multicultural environment across 2 years in Australia.
- Demonstrated rapid adaptability to a new country, culture, and demanding work environment.

Regional Development Officer | Grand Est Taekwondo — France

June 2014 – April 2017 | 3 years

- Managed multi-stakeholder development projects, secured public funding through grant applications, and coordinated 4 regional clubs.
- Strong project coordination and stakeholder communication skills developed in a leadership role.

Surveillance Assistant | Louis Lapicque Highschool — France

April 2017 – June 2018 | Fixed-Term Contract

- Developed communication, conflict resolution, and organisational skills in a secondary school environment.
- Supervised student welfare and assisted with school administration in a secondary school environment.

EDUCATION & QUALIFICATIONS

2025	Professional Title: Web & Mobile Web Developer	O'Clock Training — Professional Retraining (Pro-A) — NZ Level 5 equivalent
2016	DEJEPS — Diploma in Project Coordination & Community Development	FFTDA (French Taekwondo Federation) — NZ Level 5 equivalent
2011	French Baccalaureate	Lycée Louis Lapicque

LANGUAGES & ADDITIONAL INFORMATION

Languages

- French — Native
 - English — B2 Professional Working Proficiency
- Previously lived & worked in Australia (2018–2020)

Availability

- Full Manual & Automatic Driving Licence (since 2012)
- Available to relocate immediately
- Eligible for AEWV (NZ) and Visa 482 (AU) sponsorship
- Reference letter available (ERT Technologies HR)

INTERESTS

Running — Trail running and endurance. **Taekwondo** — Regional Development level; discipline and perseverance. **Acoustic Guitar** — Creative focus outside of technical work.

References available upon request — including written recommendation from ERT Technologies HR
